West Lafayette Community School Corporation Celebrates Continued Partnership of SK hynix with $80,000 Contribution

WEST LAFAYETTE, Ind. — The West Lafayette Community School Corporation (WLCSC) is recognizing the continued partnership of SK hynix Semiconductor West Lafayette and its investment in students, classrooms, and educational opportunities across the district. Through generous contributions of $80,000, supporting classroom resources, academic programming, and instructional technology, SK hynix is helping strengthen learning experiences for students at every level.

The partnership reflects a shared commitment to education, innovation, and preparing the next generation for success in an increasingly technology-driven world. SK hynix's support provides tangible resources for teachers and students while reinforcing the importance of community partnerships in advancing educational opportunities.

"West Lafayette Community School Corporation is extremely grateful for SK hynix's continued investment in our students and schools, particularly in expanding STEM engagement and creating meaningful learning opportunities for students. What we value most is the genuine vested interest SK hynix has demonstrated in our school community and its commitment to helping prepare our students for the opportunities of tomorrow. Their ongoing partnership provides resources that strengthen our STEM programming while sending an important message to our students that our community believes in their potential and wants to support their success."

— Dr. Shawn E. Greiner, Superintendent, West Lafayette Community School Corporation

SK hynix's contributions have supported a range of needs throughout the district, from elementary classroom books and supplies to high school academic competition fees and districtwide software. These investments help educators provide engaging learning experiences, give students access to valuable instructional resources, and support the tools needed for teaching and learning in today's schools.

The contributions include:

- Elementary Curricular Supplies $6,831.60

- Intermediate Curricular Supplies $10,536.67
- High School Curricular STEM Supplies $30,931.50 ● High School Academic STEM Competition Fees $1,135.00
- Districtwide Technology $30,565.23

Together, these contributions total **$80,000.00**, demonstrating SK hynix's meaningful commitment to supporting educational resources and opportunities across WLCSC.

The impact extends beyond the financial investment. Classroom books and supplies help teachers respond to students' learning needs and create rich, engaging instructional environments. Support for academic competitions helps students pursue challenges that extend learning beyond the traditional classroom. District software investments strengthen the digital resources that support instruction and educational operations.

These resources are especially meaningful as schools continue to emphasize science, technology, engineering, and mathematics (STEM), along with the critical thinking, collaboration, creativity, and problem-solving skills students need for future academic and career opportunities. Partnerships with organizations such as SK hynix help connect classroom learning with the broader community and demonstrate how local industry can play a valuable role in supporting student success.

West Lafayette Community School Corporation values partnerships that recognize the potential of its students and contribute to a strong educational community. SK hynix's continued support reflects an investment not only in today's classrooms, but also in the knowledge, skills, and aspirations of future generations.

The WLCSC extends its sincere appreciation to SK hynix for its generosity, continued engagement, and commitment to West Lafayette students. Through partnerships like this, the district can continue to strengthen educational experiences and create meaningful opportunities for students to learn, grow, and prepare for the future.

About West Lafayette Community School Corporation

West Lafayette Community School Corporation serves students and families in the West Lafayette community, providing educational opportunities designed to support academic achievement, personal growth, and preparation for future success.
